

**ENVIRONMENTAL HEALTH & SAFETY FACT SHEET:
SAFETY ENGINEERED SHARPS**

What is a safety engineered sharp?

The U.S. Occupational Safety and Health Administration (OSHA) defines a safety-engineered sharp as a non-needle sharp or needle device with a built-in safety feature or mechanisms that effectively reduces the risk of an exposure incident.” Examples of safety-engineered sharps include: syringes with guards or sliding sheaths, retractable needle systems, and shielded or retracting scalpels.

When should I use a safety-engineered sharp?

Ideally, principal investigators (PIs) should eliminate the use of sharps whenever possible and where safe and effective alternatives are available. However, when elimination of sharps is not feasible, safety-engineered sharps devices should be utilized whenever possible to reduce the risk of exposure to potentially infectious materials or hazardous chemicals.

SLIDING SLEEVE SYRINGES:

BD Safety-Lok™ Syringes:

- needle retracts and locks into protective sleeve after use
- available in 1, 3, 5, and 10ml sizes

BD Disposable Luer-Lok™ Syringes

- provides secure connection to prevent needle from detaching mid-injection
- available in wide variety of sizes including 1ml

PROTECTIVE SHEATH and RETRACTABLE NEEDLES:

BD SafetyGlide™ Needles

- Needle-tip shielding activation-assist technology incorporated into needle
- Available in a variety of needle sizes

BD Eclipse™ Needle

- pivoting shield mechanism; single finger stroke activation
- available in 18, 21, 22, 23 and 25G needles of varying length

Megellan™ Safety Needle

- Integral needle-based safety device
- locked position completely covers entire needle
- available in 18 - 25G needle sizes

VanishPoint® Syringes

- full depression of plunger activates needle retraction
- available in 3, 5 and 10ml syringes with variety of needle gauges and lengths

SAFETY ENGINEERED SHARPS**

Continued from page one

SAFETY NEEDLES: BLUNT; TRANSFER

SOL-M Blunt™ Fill Needles

- has a 45 degree bevel to help reduce needle stick accidents.
- needle allows easy drawing and mix of viscous medications
- have a low penetration force for ease of use.

MONOJECT™ Blunt Needle Cannula

- Stainless steel construction.
- Provides the look and feel of standard hypodermic needles without the risks
- Designed with a Luer lock connection
- Autoclavable

SAFETY BLOOD COLLECTION DEVICES

Magellan™ Safety Blood Collection Device

- Available with either a 21 G or 22 G blood collection needle with integral needle-based safety device

VanishPoint® Blood Collection Tube Holder

- compatible with standard blood collection needles
- closing cap retracts needle directly from patient

RETRACTABLE SCALPELS

DeRoyal Disposable Safety Scalpels

- And
- Futura™ Safety Scalpel**
- Blades retract into handle

Bard-Parker™ Protected Disposable Scalpel

- Sheath covers blade until you slide it out of the way
