1.0 INTRODUCTION/BACKGROUND

1.1 The University of Massachusetts is committed to preventing accidents and ensuring the safety and health of our employees. We strive to comply with all applicable federal and state health and safety rules. Under this program employees are informed of the contents of the OSHA Hazard Communications Standard, as well as the MA Right-to-Know requirements, the hazardous properties of chemicals with which they work, safe handling procedures and measures to take to protect themselves from these chemicals, which may create physical and/or health-related hazards. It is the intent of the University that all employees are aware of the chemical hazards associated with the work they do and that they are provided training and appropriate personal protective equipment (PPE) to conduct work safely.

1.2 OSHA’s Hazard Communication Standard, 1910.1200, provides for the following:
   1.2.1 Hazard determination
   1.2.2 Development, implementation, and maintenance of a written hazard communication program
   1.2.3 Regulation and maintenance of container labeling and other types of warnings
   1.2.4 Regulation and maintenance of Safety Data Sheets (SDS’s)
   1.2.5 Employee information and training
   1.2.6 Safe Storage of hazardous materials

1.3 The Massachusetts Right-to-Know Law, 454 CMR 21.00 MGL Part I Title XVI Chapter 111F, also requires a Workplace Notice, in addition to the items listed in 1.2:
   1.3.1 A notice must be posted in a central location in the workplace informing employees of their rights under the law. The notice must be in the English language. In workplaces where employees’ first language is other than English, the notice must be posted in that language.

2.0 PURPOSE

2.1 The purpose of the Written Hazard Communication Program is to ensure that:
   2.1.1 Hazardous chemicals present in the workplace are properly identified and labeled utilizing the GHS pictograms and labeling system.
   2.1.2 Employees have access to information, in an understandable format, on the hazards of these chemicals (Safety Data Sheets (SDS), labeling, etc.).
   2.1.3 Employees are provided with information on how to prevent injuries/illnesses due to exposure to the chemicals, including appropriate Personal Protective Equipment (PPE).
   2.1.4 Identifies by job title, person responsible for maintaining the program, the SDS, labeling, training, etc.
3.0 SCOPE

3.1 The scope of the Written Hazard Communication Program applies to University of Massachusetts departments which work with and use hazardous chemicals. This includes all cleaning supplies, paints, solvents, fuels, lubricating liquids, bulk chemicals, pesticides, fertilizers, and laboratory chemicals. The departments must provide information to their employees about the hazardous chemicals to which they are potentially exposed through the Hazard Communication Program.

All employees have a need and the right to know what chemicals they may contact in the workplace, their potential adverse health effects, methods of protection, and proper responses to emergencies or accidents involving them.

Requirements for personal protective equipment in laboratories shall be in accordance with the University’s Chemical Hygiene Plan. At a minimum, safety glasses and laboratory coats are required in laboratories that have hazardous chemicals. The UMass Amherst Chemical Hygiene Plan can be found at http://ehs.umass.edu/laboratory-health-and-safety-manualchemical-hygiene-plan.

4.0 ROLES & RESPONSIBILITIES

4.1 Employees

4.1.1 Responsible for following safety instructions on labels, Safety Data Sheets, and complying with safety procedures.

4.1.2 Required to complete assigned training.

4.1.3 Notify their supervisor if labels are missing or products cannot be identified.

4.2 Supervisors/Managers

4.2.1 Ensure that their staff are in compliance with this policy.

4.2.2 Address concerns, contacting EHS for assistance as needed.

4.2.3 For departments not using CEMS for chemical ordering; maintain chemical inventory for products used by the department and keep SDS binder up-to-date.

4.3 Environmental Health & Safety (EHS)

4.3.1 Responsible for maintaining chemical inventory and for uploading a current SDS into the UMass CEMS program for tracking for departments who place their orders through this system.

4.3.2 Responsible for providing chemical hazard training and information to employees.

4.3.3 Conducts exposure assessments as needed to determine employee exposure and provide guidance as needed.
4.3.4 Responds to employee concerns about chemical exposure.

5.0 PROCEDURE - CHEMICALS

5.1 Review by EHS prior to ordering a new product.
5.1.1 EHS will review and provide a recommendation for any potentially hazardous products, prior to use. The purpose of this review is to determine handling and PPE requirements, and to verify that the product can be used safely.
5.1.2 Products labeled as safe for the environment or “green” are not necessarily without hazards to humans and should be evaluated by EHS before use.

5.2 Ordering
5.2.1 Purchasing departments will obtain current SDS for products ordered and received. Hard copies will be given to EHS for review and filing. Products are not to be distributed until a current SDS is obtained.

5.3 Labeling
5.3.1 Labeling System
5.3.1.1 The labeling system used follows the requirements in the 2012 revision of the OSHA Hazard Communication Standard to be consistent with the United Nations Globally Harmonized System (GHS) of Classification of Labeling of Chemicals.

The label on the chemical is intended to convey information about the hazards posed by the chemical through standardized label elements, including symbols, signal words and hazard statements.

SEE APPENDIX 11.1 FOR AN EXAMPLE

5.3.2 Secondary containers
5.3.2.1 Bulk storage containers of hazardous material will be stored using adequate secondary containments. This means that the containment structure can contain a spill that 110% of the largest container stored.
5.3.3 Storage areas
5.3.3.1 Only designated storage areas that are compatible and in compliance with NFPA storage requirements will be used for storage.
5.3.3.2 Flammable materials will be stored in an NFPA-approved flammable storage cabinet.

5.3.4 GHS Pictograms

5.3.5 NFPA diamond

Blue = Health
Red = Flammability/Combustibility
Yellow = Instability
White = Special Information

Hazard Rating System for Chemicals
0 = None
1 = Slight
2 = Moderate
3 = Severe
4 = Deadly

SEE APPENDIX 11.2
5.3.5.1 UMA “door-cards”, which include the NFPA diamond
   5.3.5.1.1 These are typically found on laboratory doors, however can also be found in any room containing chemicals.

SEE APPENDIX 11.3 FOR AN EXAMPLE

They provide information for emergency-response personnel, appropriate staff contacts, support personnel, as well as the general public:

- Campus Emergency Phone Numbers
- Hazards
- PPE required
- (Laboratory) Emergency Information

5.4 Storage
   5.4.1 Flammable storage cabinets – must meet NFPA requirements
   5.4.2 Secondary containment
   5.4.3 Periodic inspections, at least annually, shall be performed in bulk storage and receiving locations. Any unwanted, expired, or waste like chemicals shall be removed. Inspections shall be documented and kept on file.
   5.4.3.1 Are all containers capped?
   5.4.3.2 Are containers compatible with their contents?
   5.4.3.3 Are containers in good condition?
   5.4.3.4 Are containers leaking? If yes, contact EHS.

5.5 Safety Data Sheets (SDS)
   5.5.1 The manufacturer or importer of a chemical is required by OSHA to develop a Safety Data Sheet (SDS) that contains specific, detailed information about the chemical’s hazard using a specified format. The distributor or supplier of the chemical is required to provide this SDS to the purchaser.
5.5.1.1 The following sections are included in each SDS:

Section 1 Identification
- includes product identifier; manufacturer or distributor name, address, phone number; emergency phone number; recommended use; restrictions on use

Section 2 Hazard(s) identification
- includes all hazards regarding the chemical; required label elements

Section 3 Composition/information on ingredients
- includes information on chemical ingredients; trade secret claims

Section 4 First-aid measures
- includes important symptoms/effects, acute, delayed; required treatment

Section 5 Fire-fighting measures
- lists suitable extinguishing techniques, equipment; chemical hazards from fire

Section 6 Accidental release measures
- lists emergency procedures; protective equipment; proper methods of containment and cleanup

Section 7, Handling and storage lists precautions for safe handling and storage
- including incompatibilities

Section 8 Exposure controls/personal protection
- lists OSHA’s Permissible Exposure Limits (PELs); ACGIH Threshold Limit Values (TLVs); and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the SDS where available as well as appropriate engineering controls; personal protective equipment (PPE).
Section 9 Physical and chemical properties

• lists the chemical’s characteristics

Section 10 Stability and reactivity

• lists chemical stability and possibility of hazardous reactions

Section 11 Toxicological information

• includes routes of exposure; related symptoms, acute and chronic effects; numerical measures of toxicity

Section 12 Ecological information*

Section 13 Disposal considerations*

Section 14 Transport information*

Section 15, Regulatory information*

Section 16, Other information

• includes the date of preparation or last revision.

*Note: Since other Agencies regulate this information, OSHA will not be enforcing Sections 12 through 15 (29 CFR 1910.1200(g)(2)).

SEE APPENDIX 11.4 FOR EXAMPLES

5.5.2 The receiving party (storerooms or individual departments) must forward the SDS to EHS, who will update and manage the SDS in CEMS.

5.5.3 SDS’s are readily available to all employees during their work shifts. Employees can review SDS for all hazardous chemicals used in the workplace

5.5.3.1 Electronically via the UMA database CEMS
5.5.3.2 Electronically via Manufacturers’ websites
5.5.3.3 Hard-copies stored in a central departmental location
5.5.3.4 If an SDS is not immediately available for a hazardous chemical, employees can obtain the required information by contacting their supervisor or EHS.
5.5.4 Items purchased retail usually do not come with SDS’s; they must be requested from the manufacturer.

5.5.5 If an employee needs medical attention (especially the “emergency” room), the SDS should accompany the employee.

5.5.6 SDS’s must be kept for a minimum of 30 years from the end-of-use of the chemical

5.5.7 It is recommended that the SDS’s be dated when use is discontinued and the SDS be kept on file.

5.5.8 Contact EHS if there are any questions or concerns regarding a SDS.

5.6 Personal Protective Equipment

5.6.1 Always wear safety glasses or goggles when handling chemicals along with appropriate gloves. Refer to SDS for PPE needed.

5.6.2 Refer to the “University of Massachusetts Amherst Personal Protective Equipment Policy”.

5.7 Spills/Disposal

5.7.1 Small spills – departments can perform clean-up if they are knowledgeable, otherwise contact EHS

5.7.2 Large spills – contact EHS

5.7.3 Disposal – contact EHS for waste pick-up

5.8 Routes of Exposure: “How Chemicals Enter the Body”

5.8.1 Ingestion

5.8.2 Inhalation

5.8.3 Absorption (skin)

5.8.4 Injection

5.9 Effects of Chemicals on the Body

5.9.1 Localized (one site of contact on the body); for example, acid coming into contact with a small section of skin and creating a burn

5.9.2 Systemic (widespread throughout the body); for example, inhalation of vapors/gases, damaging the lungs

5.9.3 Acute (short-term issue); for example, the effect that alcohol has on the brain and kidneys

5.9.4 Chronic (long-term issue); for example, the effects of alcohol on the liver over time.
5.10 Emergency procedures to follow if an employee is exposed to a hazardous chemical
5.10.1 If splashed in the eye, rinse for 15 minutes and seek medical attention.
5.10.2 If splashed on the skin, wash exposed skin with soap and water; seek medical attention if appropriate.
5.10.3 If inhaled, get to fresh air and seek medical attention

6.0 TRAINING
6.1 Content includes all sections of the University of Massachusetts Hazard Communication/Right to Know Program
6.2 Classroom sessions
6.3 EHS OWL – must be completed annually
6.4 Frequency
   6.4.1 Upon hire
   6.4.2 When beginning use of a product with a new or different hazard.
   6.4.3 Annual refreshers

7.0 DOCUMENTATION
7.1 Safety Data Sheets (SDS)
7.2 List/Inventory of Hazardous Chemicals in the workplace (ChEMS)
7.3 Training
7.4 Inspection checklists of storage areas

8.0 PROGRAM EVALUATION
8.1 The program is evaluated periodically to ensure that it is accurate and meeting its objectives
8.2 The program is revised as appropriate to address changed conditions (e.g. new chemicals/products, new hazards)

9.0 OTHER
9.1 Contractors/Multi-Employer workspaces
   9.1.1 Each contractor shall have their own Hazard Communication policy, which will comply with the OSHA standard.

Hazard Communication Standard Labels

OSHA has updated the requirements for labeling of hazardous chemicals under its Hazard Communication Standard (HCS). As of June 1, 2015, all labels will be required to have pictograms, a signal word, hazard and precautionary statements, the product identifier, and supplier identification. A sample revised HCS label, identifying the required label elements, is shown on the right. Supplemental information can also be provided on the label as needed.

For more information:

OSHA (800) 321-OSHA (6742)
www.osha.gov
APPENDIX 11.2 – OSHA QuickCard Hazard Communication Standard Pictogram

Hazard Communication Standard Pictogram

As of June 1, 2015, the Hazard Communication Standard (HCS) will require pictograms on labels to alert users of the chemical hazards to which they may be exposed. Each pictogram consists of a symbol on a white background framed within a red border and represents a distinct hazard(s). The pictogram on the label is determined by the chemical hazard classification.

APPENDIX 11.3 – Laboratory “Door Card”
APPENDIX 11.4.1 – Safety Data Sheet: Acetone

SAFETY DATA SHEET

Creation Date: 28-Apr-2000
Revision Date: 19-Jan-2018
Revision Number: 6

1. Identification

Product Name: Acetone
Cat No.: AC326800000; AC326800010; AC326801000; AC326802500
CAS-No: 67-64-1
Synonyms: 2-Propanone
Recommended Use: Laboratory chemicals
Uses advised against: Not for food, drug, pesticide or biocidal product use

Details of the supplier of the safety data sheet

Company
Fisher Scientific

2. Hazard(s) Identification

Classification
This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

Flammable liquids: Category 2
Serious Eye Damage/Eye Irritation: Category 2
Specific target organ toxicity (single exposure): Category 3
Target Organs - Central nervous system (CNS): Category 2
Specific target organ toxicity - (repeated exposure): Category 2
Target Organs - Kidney, Liver, spleen, Blood: Category 2

Label Elements

Signal Word: Danger

Hazard Statements
Highly flammable liquid and vapor
Causes serious eye irritation
May cause drowsiness or dizziness
May cause damage to organs through prolonged or repeated exposure
Precautionary Statements
Prevention
Wash face, hands and any exposed skin thoroughly after handling
Do not breathe dust/fume/gas/mist/vapors/spray
Use only outdoors or in a well-ventilated area
Keep away from heat/sparks/open flames/hot surfaces. - No smoking
Keep container tightly closed
Ground/bond container and receiving equipment
Use explosion-proof electrical/ventilating/lighting/equipment
Use only non-sparking tools
Take precautionary measures against static discharge
Wear protective gloves/protective clothing/eye protection/face protection
Keep cool
Response
Get medical attention/advice if you feel unwell
Inhalation
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing
Call a POISON CENTER or doctor/physician if you feel unwell
Skin
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower
Eyes
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
If eye irritation persists: Get medical advice/attention
Fire
In case of fire: Use CO2, dry chemical, or foam for extinction
Storage
Store in a well-ventilated place. Keep container tightly closed
Store locked up
Disposal
Dispose of contents/container to an approved waste disposal plant
Hazard not otherwise classified (HNOC).
Repeated exposure may cause skin dryness or cracking

3. Composition/Information on Ingredients

</tbody>
</table>

4. First-aid measures

General Advice
If symptoms persist, call a physician.

Eye Contact
Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.

Skin Contact
Wash off immediately with plenty of water for at least 15 minutes. If skin irritation persists, call a physician.

Inhalation
Move to fresh air. If not breathing, give artificial respiration. Get medical attention if
Acetone

Revision Date 19-Jan-2018

Ingestion
Clean mouth with water and drink afterwards plenty of water.

Most important symptoms and effects
None reasonably foreseeable. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. May cause pulmonary edema. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting.

Notes to Physician
Treat symptomatically

5. Fire-fighting measures

Suitable Extinguishing Media
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Cool closed containers exposed to fire with water spray.

Unsuitable Extinguishing Media
Water may be ineffective

Flash Point
-20 °C / -4 °F

Method -
Closed cup

Autoignition Temperature
465 °C / 869 °F

Explosion Limits
Upper
12.8 vol %

Lower
2.5 vol %

Oxidizing Properties
Not oxidising

Sensitivity to Mechanical Impact
No information available

Sensitivity to Static Discharge
No information available

Specific Hazards Arising from the Chemical
Flammable. Risk of ignition. Containers may explode when heated. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back.

Hazardous Combustion Products
Carbon monoxide (CO) Carbon dioxide (CO₂) Formaldehyde Methanol

Protective Equipment and Precautions for Firefighters
As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

NFPA

Health 2
Flammability 3
Instability 0
Physical hazards N/A

6. Accidental release measures

Personal Precautions
Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.

Environmental Precautions
Should not be released into the environment.

Methods for Containment and Clean Up
Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.

7. Handling and storage

Handling
Do not get in eyes, on skin, or on clothing. Wear personal protective equipment. Ensure adequate ventilation. Avoid ingestion and inhalation. Keep away from open flames, hot surfaces and sources of ignition. Use only non-sparking tools. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Take precautionary measures against static discharges.
Acetone

Storage
Flammables area. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from heat and sources of ignition.

8. Exposure controls / personal protection

ACGIH - American Conference of Governmental Industrial Hygienists
OSHA - Occupational Safety and Health Administration
NIOSH IDLH: The National Institute for Occupational Safety and Health Immediately Dangerous to Life or Health

Engineering Measures
Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Use explosion-proof electrical/ventilating/lighting/equipment.

Personal Protective Equipment

Eye/face Protection
Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA’s eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.

Skin and body protection
Long sleeved clothing.

Respiratory Protection
Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

Hygiene Measures
Handle in accordance with good industrial hygiene and safety practice.

10. Stability and reactivity

Reactive Hazard
None known, based on information available

Stability
Stable under normal conditions.

Conditions to Avoid
Heat, flames and sparks. Incompatible products. Keep away from open flames, hot surfaces and sources of ignition.

Incompatible Materials
Strong oxidizing agents, Strong reducing agents, Strong bases, Peroxides, Halogenated compounds, Alkali metals, Amines

Hazardous Decomposition Products
Carbon monoxide (CO), Carbon dioxide (CO₂), Formaldehyde, Methanol

Hazardous Polymerization
Hazardous polymerization does not occur.

Hazardous Reactions
None under normal processing.

Persistence and Degradability
Persistence is unlikely based on information available.

Bioaccumulation/Accumulation
No information available.

Mobility
Will likely be mobile in the environment due to its volatility.

13. Disposal considerations

Waste Disposal Methods
Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations to ensure complete and accurate classification.

Legend:
X - Listed
E - Indicates a substance that is the subject of a Section 5(e) Consent order under TSCA.
F - Indicates a substance that is the subject of a Section 5(f) Rule under TSCA.
N - Indicates a polymeric substance containing no free-radical initiator in its inventory name but is considered to cover the designated polymer made with any free-radical initiator regardless of the amount used.
P - Indicates a commenced PMN substance
R - Indicates a substance that is the subject of a Section 6 risk management rule under TSCA.
S - Indicates a substance that is identified in a proposed or final Significant New Use Rule
T - Indicates a substance that is the subject of a Section 4 test rule under TSCA.
XU - Indicates a substance exempt from reporting under the Inventory Update Rule, i.e. Partial Updating of the TSCA Inventory Data Base Production and Site Reports (40 CFR 710(B)).
Y1 - Indicates an exempt polymer that has a number-average molecular weight of 1,000 or greater.
Y2 - Indicates an exempt polymer that is a polyester and is made only from reactants included in a specified list of low concern reactants that comprises one of the eligibility criteria for the exemption rule.

16. Other information

Prepared By
Regulatory Affairs
Thermo Fisher Scientific
Email: EMSDS.RA@thermofisher.com

Creation Date 28-Apr-2009
Revision Date 19-Jan-2018
Print Date 19-Jan-2018
Revision Summary
This document has been updated to comply with the US OSHA HazCom 2012 Standard replacing the current legislation under 29 CFR 1910.1200 to align with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS).

Disclaimer
The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

End of SDS
APPENDIX 11.4.2 – Safety Data Sheet: WD-40

1 - Identification

Product Name: WD-40 Multi-Use Product Aerosol
NOT FOR SALE IN CALIFORNIA

Product Use: Lubricant, Penetrant, Drives Out Moisture, Removes and Protects Surfaces From Corrosion

Restrictions on Use: None identified

SDS Date Of Preparation: 07/20/2014

Manufacturer: WD-40 Company
Address: 1061 Cudahy Place (92110)
P.O. Box 80607
San Diego, California, USA
92138-0607

Telephone: Emergency only: 1-888-324-7596 (PROSAR)
Information: 1-888-324-7596
Chemical Spills: 1-800-424-9300 (Chemtrec)
1-703-527-3887 (International Calls)

2 – Hazards Identification

Hazcom 2012/GHS Classification:
Flammable Aerosol Category 1
Gas Under Pressure: Compressed Gas
Aspiration Toxicity Category 1

Note: This product is a consumer product and is labeled in accordance with the US Consumer Product Safety Commission regulations which take precedence over OSHA Hazard Communication labeling. The actual container label will not include the label elements below. The labeling below applies to industrial/professional products.

Label Elements:

- DANGER!
- Extremely Flammable Aerosol.
- Contains gas under pressure; may explode if heated.
- May be fatal if swallowed and enters airways.
- Prevention
- Keep away from heat, sparks, open flames, hot surfaces – No smoking.
- Do not spray on an open flame or other ignition source.
- Pressurized container: Do not pierce or burn, even after use.
- Response
- IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting.
- Storage
- Store locked up.
- Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Store in a well-ventilated place.
- Dispose of contents and container in accordance with local and national regulations.

3 - Composition/Information on Ingredients

<table>
<thead>
<tr>

<th>US Hazcom 2012/ GHS Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aliphatic Hydrocarbon</td>
<td>84742-47-8</td>
<td>45-50</td>
<td>Flammable Liquid Category 3</td>
</tr>
</tbody>
</table>
4 – First Aid Measures

Ingestion (Swallowed): Aspiration Hazard. DO NOT induce vomiting. Call physician, poison control center or the WD-40 Safety Hotline at 1-888-324-7596 immediately.
Eye Contact: Flush thoroughly with water. Remove contact lenses if present after the first 5 minutes and continue flushing for several more minutes. Get medical attention if irritation persists.
Skin Contact: Wash with soap and water. If irritation develops and persists, get medical attention.
Inhalation (Breathing): If irritation is experienced, move to fresh air. Get medical attention if irritation or other symptoms develop and persist.
Signs and Symptoms of Exposure: May cause eye and respiratory irritation. Inhalation may cause coughing, headache and dizziness. Skin contact may cause drying of the skin.
Indication of Immediate Medical Attention/Special Treatment Needed: Immediate medical attention is needed for ingestion.

5 – Fire Fighting Measures

Suitable (and unsuitable) Extinguishing Media: Use water fog, dry chemical, carbon dioxide or foam. Do not use water jet or flooding amounts of water. Burning product will float on the surface and spread fire.
Specific Hazards Arising from the Chemical: Contents under pressure. Keep away from ignition sources and open flames. Exposure of containers to extreme heat and flames can cause them to rupture often with violent force. Vapors are heavier than air and may travel along surfaces to remote ignition sources and flash back. Combustion will produce oxides of carbon and hydrocarbons.
Special Protective Equipment and Precautions for Fire-Fighters: Firefighters should always wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire-exposed containers with water. Use shielding to protect against bursting containers.

6 – Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures: Wear appropriate protective clothing (see Section 8). Eliminate all sources of ignition and ventilate area.
Methods and Materials for Containment/Cleanup: Leaking cans should be placed in a plastic bag or open pan until the pressure has dissipated. Contain and collect liquid with an inert absorbent and place in a container for disposal. Clean spill area thoroughly. Report spills to authorities as required.

7 – Handling and Storage

Precautions for Safe Handling: Avoid contact with eyes. Avoid prolonged contact with skin. Avoid breathing vapors or aerosols. Use only with adequate ventilation. Keep away from heat, sparks, pilot lights, hot surfaces and open flames. Unplug electrical tools, motors and appliances before spraying or bringing the can near any source of electricity. Electricity can burn a hole in the can and cause contents to burst into flames. To avoid serious burn injury, do not let the can touch battery terminals, electrical connections on motors or appliances or any other source of electricity. Wash thoroughly with soap and water after handling. Keep containers closed when not in use. Keep out of the reach of children. Do not puncture, crush or incinerate containers, even when empty.
### Conditions for Safe Storage
Store in a cool, well-ventilated area, away from incompatible materials. Do not store above 120°F or in direct sunlight. U.F.C (NFPA 30B) Level 3 Aerosol. Store away from oxidizers.

### 8 – Exposure Controls/Personal Protection

<table>
<thead>
<tr>

</tbody>
</table>

The Following Controls are Recommended for Normal Consumer Use of this Product

**Appropriate Engineering Controls:** Use in a well-ventilated area.

**Personal Protection:**
- Eye Protection: Avoid eye contact. Always spray away from your face.
- Skin Protection: Avoid prolonged skin contact. Chemical resistant gloves recommended for operations where skin contact is likely.
- Respiratory Protection: None needed for normal use with adequate ventilation.

For Bulk Processing or Workplace Use the Following Controls are Recommended

**Appropriate Engineering Controls:** Use adequate general and local exhaust ventilation to maintain exposure levels below that occupational exposure limits.

**Personal Protection:**
- Eye Protection: Safety goggles recommended where eye contact is possible.
- Skin Protection: Wear chemical resistant gloves.
- Respiratory Protection: None required if ventilation is adequate. If the occupational exposure limits are exceeded, wear a NIOSH approved respirator. Respirator selection and use should be based on contaminant type, form and concentration. Follow OSHA 1910.134, ANSI Z88.2 and good Industrial Hygiene practice.

**Work/Hygiene Practices:** Wash with soap and water after handling.

### 9 – Physical and Chemical Properties

**LEL:** 0.6% **UEL:** 8% **Vapor Pressure:** 95-115 PSI @ 70°F **Vapor Density:** Greater than 1 (air=1) **Relative Density:** 0.8 – 0.82 @ 60°F **Partition Coefficient:** n-octanol/water Not established **Autoignition Temperature:** Not established **Decomposition Temperature:** Not established **Viscosity:** 2.70-2.96 cSt @ 100°F **Pour Point:** -63°C (-81.4°F) ASTM D-97 **Insoluble in water**

### 10 – Stability and Reactivity

**Reactivity:** Not reactive under normal conditions

**Chemical Stability:** Stable
11 – Toxicological Information

Symptoms of Overexposure:
Inhalation: High concentrations may cause nasal and respiratory irritation and central nervous system effects such as headache, dizziness and nausea. Intentional abuse may be harmful or fatal.
Skin Contact: Prolonged and/or repeated contact may produce mild irritation and defatting with possible dermatitis.
Eye Contact: Contact may be irritating to eyes. May cause redness and tearing.
Ingestion: This product has low oral toxicity. Swallowing may cause gastrointestinal irritation, nausea, vomiting and diarrhea. This product is an aspiration hazard. If swallowed, can enter the lungs and may cause chemical pneumonitis, severe lung damage and death.
Chronic Effects: None expected.
Carcinogen Status: None of the components are listed as a carcinogen or suspect carcinogen by IARC, NTP, ACGIH or OSHA.
Reproductive Toxicity: None of the components is considered a reproductive hazard.

Numerical Measures of Toxicity:
The oral toxicity of this product is estimated to be greater than 5,000 mg/kg and the dermal toxicity greater than 2,000 mg/kg based on an assessment of the ingredients. This product is not classified as toxic by established criteria. It is an aspiration hazard.

12 – Ecological Information

Ecotoxicity: No specific aquatic toxicity data is currently available, however components of this product are not expected to be harmful to aquatic organisms
Persistence and Degradability: Component are readily biodegradable.
Bioaccumulative Potential: Bioaccumulation is not expected based on an assessment of the ingredients.
Mobility in Soil: No data available
Other Adverse Effects: None known

13 – Disposal Considerations

If this product becomes a waste, it would be expected to meet the criteria of a RCRA ignitable hazardous waste (D001). However, it is the responsibility of the generator to determine at the time of disposal the proper classification and method of disposal. Do not puncture or incinerate containers, even empty. Dispose in accordance with federal, state, and local regulations.

14 – Transportation Information

DOT Surface Shipping Description:
UN1950, Aerosols, 2.1 Ltd. Qty. (Note: Shipping Papers are not required for Limited Quantities unless transported by air or vessel – each package must be marked with the Limited Quantity Mark)
IMDG Shipping Description: Un1950, Aerosols, 2.1, LTD QTY
ICAO Shipping Description: UN1950, Aerosols, flammable, 2.1 NOTE: WD-40 does not test aerosol cans to assure that they meet the pressure and other requirements for transport by air. We do not recommend that our aerosol products be transported by air.

15 – Regulatory Information

U.S. Federal Regulations:
CERCLA 103 Reportable Quantity: This product is not subject to CERCLA reporting requirements, however, oil spills are reportable to the National Response Center under the Clean Water Act and many
Hazard Communication/ Right-to-Know Policy

states have more stringent release reporting requirements. Report spills required under federal, state and local regulations.

SARA TITLE III:
Hazard Category For Section 311/312: Acute Health, Fire Hazard, Sudden Release of Pressure
Section 313 Toxic Chemicals: This product contains the following chemicals subject to SARA Title III
Section 313 Reporting requirements: None
Section 302 Extremely Hazardous Substances (TPQ): None
EPA Toxic Substances Control Act (TSCA) Status: All of the components of this product are listed on the TSCA inventory.

VOC Regulations: This product complies with the consumer product VOC limits of the US EPA and states adopting the OTC VOC rules but does not comply with CARB.

California Safe Drinking Water and Toxic Enforcement Act (Proposition 65): This product does not contain chemicals regulated under California Proposition 65.

Canadian Environmental Protection Act: One of the components is listed on the NDSL. All of the other ingredients are listed on the Canadian Domestic Substances List or exempt from notification.

Canadian WHMIS Classification: Class A (Compressed gas), Class B-5 (Flammable Aerosol)

This MSDS has been prepared according to the criteria of the Controlled Products Regulation (CPR) and the MSDS contains all of the information required by the CPR.

16 – Other Information:

HMIS Hazard Rating:
Health – 1 (slight hazard), Fire Hazard – 4 (severe hazard), Reactivity – 0 (minimal hazard)

Revision Date: July 20, 2014 Supersedes: May 23, 2014

Revision Summary: Convert to Hazoom 2012. Changes in all sections.

Prepared by: Industrial Health & Safety Consultants, Inc. Shelton, CT, USA
